

INARTISSE

hand-finish paint effects

Please Note

Our hand finishes are designed to make it possible to find the right match between hardware and fabric. Although we aim for consistency hand finished paint effects may vary from job to job. Each rod is unique and personal to the new owner.

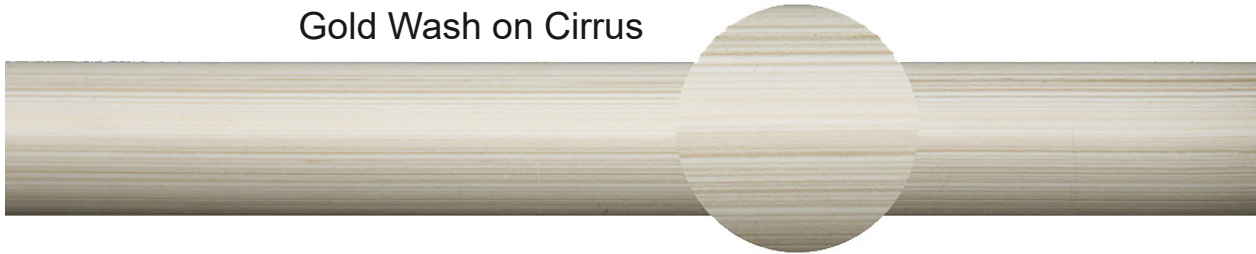

We can occasionally vary the effects according to client wishes but samples will need to be made and approved by the customer first. Once a sample is approved the customer retains a piece, Matisse retain a piece and the retailer retains a piece. Non Standard effects and variations may involve an extra charge.

Although we have taken care to Show colours as close as possible, those shown here may not be an exact match to the actual item depending on your monitor settings and calibration.
